# Products Description

## ECO-KIT BOKASHI

Our Bokashi composting kit is an eco-friendly composting solution designed to accelerate food waste decomposition more effectively and safely for plants.

### Benefits:

- Effectively reduce kitchen waste odors.
- Produce high-quality organic fertilizers.
- Accelerate composting processes once food waste is well-fermented.
- Kitchen-friendly for efficient food waste management.

## ECOBRAN

Our Ecobran is a fermentation starter made from rice husks mixed with EM (Effective Microorganism) solution. It is used to accelerate the fermentation of food waste in an oxygen-free environment. The result is a nutrient-rich natural fertilizer that nourishes your plants!

### Benefits:

- Speed up food waste fermentation.
- Reduce foul odors from kitchen waste.
- Produce nutrient-rich compost.
- Generate organic fertilizers through the fermentation of kitchen waste and bokashi tea for plants.

## ECOSHELL

Our EcoShell is a natural eggshell powder that is clean and safely processed to provide additional calcium to the soil, thereby strengthening plant roots.

### Benefits:

- A natural calcium source.
- Increase the pH of acidic soil.
- Boosts mineral content when thoroughly mixed into soil.
- Naturally deters pests like slugs and snails.
- Eco-friendly and safe for all plant types.
